## TECHNICAL SKILLS

### PROGRAMMING

• Python

### FRAMEWORK

• Django • FastAPI • Kafka • Flink

### AI

• Langchain • RAG • MCP • A2A

### CLOUD AND DATABASE

• AWS • PostgreSQL • MongoDB  
• SQL • NoSQL • S3

### INFRA MANAGEMENT

• Docker • Kubernetes  
• Terraform

### OTHERS

• Software Development Life Cycle  
• Distributed Systems  
• Microservices Architecture  
• Event Driven Architecture  
• Real-time streaming pipelines

## PERSONAL SKILLS

• Problem Solving • Communication  
• Team Player • Analytical Skills  
• Critical Thinking

## EXPERIENCE

### CONFLUENT | ADVISORY SOLUTIONS ENGINEER

Jan 2026 – Present | Bangalore, India

- Helping customers implement GenAI use cases on top of real-time streaming platform with MCP, Streaming Agentic AI using Kafka and Flink.
- Handling complex customer POC's involving hybrid networking, High availability, Fault tolerance streaming pipelines with Kafka and Flink on kubernetes.

### CONFLUENT | SOLUTIONS ENGINEER

March 2024 – Present | Bangalore, India

- Worked as a SME for Flink at Confluent handling complex stream processing use-cases for both stateful and stateless transformations.
- Contributed in the discovery of potential prospects' workloads with their use cases by providing robust architecture solutions that solve customer pain points.
- Helped multiple customers with their POC's guiding them with the technical details on journey from Development till Production.

### QUANTIPHI | SENIOR SOFTWARE DEVELOPER

April 2023 - March 2024 | Bangalore, India

- Designed a Historical validation framework using the Command design pattern reducing the overpayment of claims by 100%.
- Contributed to the design and implementation of the logger framework, leveraging the Observer design pattern, leading to a 50% increase in issue detection efficiency and improved system reliability.
- Proposed and developed the APPROVAL process for claims adjudicated by reviewers, resulting in a 20% decrease in claim approval time.

### QUANTIPHI | FRAMEWORK ENGINEER [ SOFTWARE DEVELOPER ]

August 2021 - March 2023 | Bangalore, India

- Implemented a SAML-based PING Authentication on the UI, resulting in a 50% reduction in user login time improving the user app engagement by 20%.
- Streamlined the ingestion process for several Lines of Business (LOB), amplifying claim processing capacity by an exceptional 30% and enhancing the application's scalability to support future growth.
- Played a pivotal role in key features, MERGE and REALTIME, enabling historical data retention and transitioning data processing from batch to real-time for enhanced system performance.

## CERTIFICATIONS

- AWS Certified Advanced Networking Speciality
- AWS Certified Solution Architect Associate
